

Technical and Personal Skills

10+ Years	5+ Years	2+ Years	Beginner
Linux Server	C++	SQLite	MIPS Assembly
Bash Scripting	Java	Python	CATIA
MATLAB	git	Solidworks	AWS SDK
Spanish	Wolfram Language	L ^A T _E X	Mandarin Chinese

Projects

Bay Area Rapid Transit Geolocation System

<https://github.com/ejtejada/Geotaggers>

- ◇ Collaborated on an RFID location system for tracking maintenance workers in tunnels without GPS signal
- ◇ Wrote Python controls for the Raspberry Pi and antenna boards to secure wireless I/O at over 5 foot distances

Society of Automotive Engineers Test Bench

<https://github.com/brevsae/sae-testbench>

- ◇ Employs Arduino controlled fans and kill switches to ensure battery temperatures remained below 60° C
- ◇ Streamlines battery simulations with MATLAB+Solidworks to actualize BMS of LiFePO4 cells in 17s6p array

MacREU 2017 Image Processing

<https://github.com/ejtejada/MacREU2017ImageProcessing>

- ◇ Built Wolfram library for predicting position and analyzing triangular metals in florescent benzene baths
- ◇ Interpolated future positions of metal particles using similarity transforms and lagrange polynomials

Experience

Engineer, School of Engineering

August 2021 to Present

Lennox School District, Moffett Elementary, Lennox, CA

- ◇ Managed a project based makerspace that fosters programming, electronics design, and 3D printing
- ◇ Maintained the function and security of the makerspace's 3D Printers, Laser Cutters, and Chromebooks
- ◇ Led monthly meetings with other engineers so as to submit technology purchase orders from approved vendors

Undergraduate Intern, Crypto Market Researcher

June 2019 to August 2019

Loopring, Shanghai, People's Republic of China

- ◇ Investigated the public actions of competing cryptocurrency exchanges and compiled findings into internal reports
- ◇ Presented biweekly reports to cross-functional teams composed of developers and the marketing team
- ◇ Debugged and documented TRON to ERC-20/Ethereum exchanging smart contracts in the Solidity language

Undergraduate Intern, Material Science Department

June 2017 to August 2017

Materials Connection REU, University of California Riverside, Riverside, CA

- ◇ Implemented object tracking of transition metal nanolayers in Wolfram, lowering measurement times by 10%
- ◇ Developed library to interpolate future particle positions using similarity transforms and lagrange polynomial
- ◇ Improved reusability via libraries, documented the lab's Wolfram codebase, and automated offsite backups

Education

University of California Merced, Merced, CA

May 2020

Bachelor of Science in Computer Science and Engineering, Minor in Writing

Selected Coursework: Intro to AI, Numerical Methods, Writing in NatSci, Databases, Operating Systems, Computer Vision

El Camino College, Torrance, CA

August 2024

Associates of Arts in English, Certificate in Cloud Computing with Amazon Web Services

Coursework: Creative Fiction, Public Speaking, Data Structures, Compute Engines with AWS, Security with AWS

Leadership Roles

Electrical Systems Officer @ Formula Society of Automotive Engineers, UC Merced

June 2018 to June 2019

- ◇ Implemented and tested electrical control and safety systems for a formula race car's high voltage components
- ◇ Modeled vehicle kinematics and optimized tire camber using MATLAB and Simulink

President @ Inter-Club Council, El Camino College

August 2016 to May 2017

- ◇ Enforced parliamentary voting procedure for ICC, a student government that oversaw all clubs and charters

Certificates

AWS Certified Cloud Practitioner (CLF-C02)

April 2024

CATIA - 3D Designer & Drafter Certificate

August 2025
